Requirements Collection Phase

Problem Statement:
Create an app that lets housemates keep track of shared chores, log when they have individually completed a chore, be notified when a chore should be done, be notified when a housemate has completed a chore

Functional Requirements

As a housemate I would like to store all of the chores that need to get done in my house, so I can revisit the list of chores

As a housemate I would like to store all of the chores that need to get done in my house, so I can update the status of those chores as I complete them

As a housemate I would like to store all of the chores that need to get done in my house, so that I can share them with my other housemates

As a housemate I would like to be notified when my housemates have updated a chore, so that I can thank them

As a housemate I would like to create a private house group, so I can add my other housemates and we can share status updates on our shared chores

Requirements Collection Phase continued

Problem Statement:
Create an app that lets housemates keep track of shared chores, log when they have individually completed a chore, be notified when a chore should be done, be notified when a housemate has completed a chore

Non-Functional Requirements

Build to support iOS 13

Create a dedicated support website and include the link in the app's description and its "About" page
